

# ACCURPRESS OPTIONAL ADVANTAGE PACKAGE

## DUAL RAM FEEDBACK FOR PRECISION STAGE BENDING

- The ADVANTAGE package is available on all Accurpress models up to 30HP unit size only.
- Dual Ram Encoders are a standard feature on Accurpress models 40HP and larger.

### 0.0004" REPEAT ACCURACY

- +/- 0.0004" accuracies via a Proportional Valve Hydraulic System.

### DUAL RAM FEEDBACK SYSTEM

- Dual ram feedback via encoders mounted at each end of the Accurpress.
- Encoders measure position during the bending cycle and compensate the ram accordingly when unequal forces are applied across the length.
- Dual ram feedback offers a huge advantage for precision stage bending applications.

### RAM TILT INDICATOR

- Attractive front covers complete with a Dial Indicator measures the applied ram tilt adjustment.
